

Prior Authorization List 2022

All services and procedures, regardless of place of service, must be medically necessary, subject to CMS regulations. If a service performed is not covered by Medicare or an additional benefit offered by the health plan, the claim will be denied as a non-covered service per Medicare criteria. An approved authorization is not a guarantee of payment. Payment is based on benefits in effect at the time of service, member eligibility, and medical necessity.

Not experimental or investigational); and

Appropriate, including the duration and frequency that is considered appropriate for the item or service, in terms of whether it is:

Furnished in accordance with accepted standards of medical practice for the diagnosis or treatment of the patient's condition or to improve the function of a malformed body member.

Furnished in a setting appropriate to the patient's medical needs and condition.

Ordered and furnished by qualified personnel; One that meets, but does not exceed, the patient's medical need; and

At least as beneficial as an existing and available medically appropriate alternative

Our definition (P3 Definition) for “experimental” or “investigational” or “unproven” services

The use of a technology drug, device, treatment, or procedure that has not been recognized as having proven benefit in clinical medicine for any condition, illness, disease, or injury being treated. A drug, device, procedure, or service will be deemed, experimental, investigational, or unproven if any of the following criteria exist:

Has not successfully completed a Phase III trial: and

Has not been approved by the FDA; and

Are not generally recognized as the accepted standard treatment for the disease or condition from which the patient suffers; and

Experimental or investigational or unproven treatments may also include off-label therapies (medical therapies that use a FDA approved drug or procedure for a non-indicated use); and

Fulfillment of the following five criteria is necessary to establish a treatment as not experimental/investigational:

The device/service must have received final approval from the appropriate regulatory agency (e.g., FDA), and

Published peer-reviewed literature must demonstrate the proven beneficial impact of the service/procedure on health outcomes for the given indication, and

Published peer-reviewed literature must demonstrate that the technology must be at least as effective as

established technology for the given indication, and

Office Procedures:
